

CLAIMS

I claim:

1. A medical port for an emergency safety resuscitator having a collapsible bag with an outlet, which comprises:
 - an adapter having a first end available for attachment to and communication with a collapsible bag of a resuscitator and also having a second end;
 - a tube having a first aperture attached to and communicating with the second end of a collapsible bag of a resuscitator, a second aperture, and a third aperture available for connection to a mask or an endotracheal tube.
2. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 1, further comprising:
 - a self-sealing membrane releasably covering the second aperture of said tube.
3. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 2, further comprising:
 - two or more strips of flexible plastic, each strip having a first end attached to the inside of said tube, between the first aperture and the second aperture, and a second end pushing against a second end of at least one other of said strips.
4. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 3, wherein:
 - said adapter and said tube are constructed of rigid clear plastic.
5. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 4, wherein:
 - said self-sealing membrane is siliconized.
6. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 3, wherein:
 - said adapter and said self-sealing membrane is siliconized.
7. The medical port for an emergency safety resuscitator having a collapsible bag with an outlet as recited in claim 2, wherein:
 - said adapter and said tube are constructed of rigid clear plastic.
